## SANGAT PRECISION MACHINING OFFERS PERSONALIZED APPROACH

---

Sangat relocated its operations to Longmont in early 2008 to the Creekside Business Park at Sunset and Pike Road. Sangat Precision Machining & Grinding provides precision machining and manufacturing services on a contract basis, and has particular expertise in machining high tolerance parts from difficult to machine materials and working with tight deadlines.

Sangat Precision Machining & Grinding is dedicated to providing scientific research institutes, aerospace companies, weapons manufacturers and their contractors top quality prototypes and short and long-run production machining to specification. They are focused on maintaining their track record of quick turn-around times and delivery of fully inspected products with which their customers are 100% satisfied. As a result, Sangat is an exception or rare instance in the industry.

At Sangat Precision they believe in a time-tested set of values; they deliver quality work on time for a fair price. Every component or assembly is fully inspected before it leaves their hands. Every part they ship meets and/or exceeds their customers' expectations. They invest in a highly skilled and motivated workforce and state-of-the-art equipment which allows their people to showcase their talents and skills. Michelle Jordan, Sangat's Chief Operating Officer notes that one of the reasons they selected Longmont for this facility was due to the "proximity of a well-qualified and interested talent pool." Their investment in people and machinery provides their customers with service they can rely on time and again.

Jordan adds that "when you entrust Sangat Precision to provide you with components and assemblies, you can be rest assured that we aren't looking solely at the short term. We want to establish a continuing relationship with you and your company." Whether you're a new company just getting started, or a well established presence in the industry, their goal is to establish and maintain a solid relationship for the long haul.

Other advantages cited by Jordan for locating to Longmont included the availability, quality and affordability of the local real estate market; and proximity to the region's technological centers and to the I-25 corridor. "The pro-business attitude of the city, combined with the close knit community feel that Longmont still maintains helped us to choose Longmont for our operation," notes Jordan.

Sangat believes the more you get to know them the more you will truly appreciate their commitment to their values of providing the highest quality products and services, on-time delivery and their personalized approach.
