

### Press Release

For immediate release (Longmont, Colorado December 29, 2009): Sangat Precision has been re-certified for ISO 9001 under the new 2008 requirements –

ISO 9001 certification creates an operational framework involving standardized systems and procedures – essentially creating a systemic approach to producing a given product or service in order to ensure that product or service meets customer requirements and expectations. For customers, the certification ensures that production of the product or service meets pre-determined requirements and that the production processes follows a globally accepted and defined process known to yield the desired end result. In addition, this also means that the applicable goods and/or services are competitive in global markets.

“We can’t overstate the importance of being ISO certified to our business,” said Michelle Jordan, COO of Sangat precision. “Our company is dedicated to offering very high quality services. Having the ISO certification in place demonstrates that we actually practice what we preach in terms of quality and on-time delivery.”

Sangat Precision Machining & Grinding is a Longmont, Colorado-based precision manufacturing company. Sangat Precision, an ISO 9001:2008 certified facility, provides precision machining and manufacturing services for aerospace, photonics, defense, science, medicine, and small-arms manufacturers. Sangat Precision has particular expertise in machining high tolerance parts from exotic and/or difficult to machine materials and in working with tight deadlines. Sangat Precision Machining & Grinding – *we make you look good because we do it right the first time™*.
